Office Action Summary

Application No.

10/760,326

Applicant(s)

WINTERS ET AL.

Examiner

Peter Szekely

Art Unit

1714

– The MAILING DATE of this communication appears on the cover sheet with the correspondence address –
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 10 June 2005.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-30 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 1-30 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☒ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☒ All b) ☐ Some * c) ☐ None of:
- 1) ☒ Certified copies of the priority documents have been received.
 - 2) ☐ Certified copies of the priority documents have been received in Application No. _____.
 - 3) ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

2. Claims 1-30 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter, which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. There is nothing in the specification to show the composition of the ester compound or the way the ester compound is formed in the reaction of the diene, the dienophile and the carboxylic acid. The Examples do not even mention the ester compound. The ingredients claimed do not comprise any ingredient containing a hydroxyl group, which is generally essential for the formation of an ester. One of ordinary skill in the art, including this examiner, would not know how to get at least 5% or 10% ester compound from the above reaction. Applicants are requested to show the reaction of the diene and the dienophile with the carboxylic acid resulting in the polymer and the ester compound.

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter, which the applicant regards as his invention.

Art Unit: 1714

4. Claims 8, 9, 17, 19 and 22-25 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.
5. There are no inorganic carboxylic acids (claim 8). Claims 9 and 17 are indefinite because of the phrase "a derivative of a rosin acid". Carbon dioxide is a derivative of rosin acid. It is derived by burning. Acrylics are not hydrocarbons (claim 19).
6. Claims 22-25 are rejected under 35 U.S.C. 112, second paragraph, as being incomplete for omitting essential elements, such omission amounting to a gap between the elements. See MPEP § 2172.01. The omitted elements are: matrix polymers. A tackifier by itself is not an adhesive.

Claim Rejections - 35 USC § 102

7. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

8. Claims 1-30 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Laurito 4,433,100 or Reichhold Chemicals Inc. EP 300 624.
9. Laurito discloses the reaction product of dicyclopentadiene, a hydrocarbon and a fatty acid or a rosin acid in claims 1-7. The hydrocarbons can be cyclic olefins (claims 11, 14, 17, 18 and 20). For terpenes see column 11, lines 19-23. Dicyclopentadiene concentrations are shown in column 4, lines 65-69, hydrocarbon concentrations in

Art Unit: 1714

column 28, lines 25-33 and acid concentrations in column 30, lines 13-29. Acid numbers can be found in column 32, lines 29-56. Reichhold Chemicals teaches a reaction product of a dicyclopentadiene, styrene and rosin acid or maleic anhydride or acrylic acid having an acid number of 10-150 in claims 1-3. For disproportionated rosin see Example 15. Adhesives are shown in claims 6-8. Concentrations and preferred acid numbers are shown on page 3, lines 17-22. Acid concentrations can be found in the Examples. There is no ester compound shown, but then there it is not shown in applicants' examples either, so it must be inherent in the reaction. All properties are inherent in composition and/or the process. In the alternative, it would have been obvious to select applicants' dienophiles from a list of equivalents.

9. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Peter Szekely whose telephone number is (571) 272-1124. The examiner can normally be reached on 7:00 a.m.-5:30 p.m. Tuesday-Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Vasu Jagannathan can be reached on (571) 272-1119. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
